SOURCE MEDIA REQUIREMENTS

All Blu-Ray images must be authored to accept AACS encryption. Conectiv can accept both pre-encrypted and unencrypted AACS images. Unencrypted AACS images will be submitted to AACS for certification. In this case please provide your AACS license number.

Electronic transfer source delivery is acceptable. This method requires an established Wam!Net Direct!Gateway or Aspera connection and trading relationship with Conectiv. The package must be identified using the Conectiv GIL naming convention. Contact your assigned Conectiv Customer Service Representative for GIL naming requirements.

If physical media is provided, Conectiv accepts LTO which is preferred source or a USB 2.0/3.0/Firewire compatible hard disk. The image supplied on LTO must be archived using Windows Backup format. Contact your assigned Conectiv Customer Service Representative for format requirements on images supplied via hard disk.

BD-R as a master carrier method is very sensitive to any mechanical damage (scratches, dents, etc.). Please carefully guard this media before sending.
