SOURCE MEDIA REQUIREMENTS

- All HD Blu-ray images must be authored to accept AACs encryption. Conectiv can accept both pre encrypted and unencrypted AACs images. Unencrypted AACs images will be submitted to AACs for certification.
- Aspera source delivery is preferred. This method requires an established Aspera connection with Conectiv. The package must be identified using the Conectiv Global Identification Label (GIL) naming convention. Contact your assigned Conectiv Customer Service Representative for GIL naming requirements.
- If physical media is provided, Conectiv accepts LTO or DLT tapes or a USB 2.0 compatible hard disk. The image supplied on LTO or DLT must be archived using Windows Backup format. Contact your assigned Conectiv Customer Service Representative for format requirements on images supplied via hard disk.
