Optical Input Media Form UHD

This form must be completed once for each input media item supplied to Conectiv Supply Chain Solutions. In other words, a DVD-9 would require two forms (one for each layer). Conectiv recommends that this form be completed by the Authoring facility.

Shipping Address: Lee Vault – Av Labna 1781, Jardines del Sol, Zapopan Jal, Mexico 45050

SOURCE MEDIA REQUIREMENTS

1. All Ultra HD Blu-ray images must be authored to accept AACS2 encryption. Conectiv can accept both pre-encrypted (Type-C) and unencrypted (Type-A) AACS2 images. Unencrypted AACS2 images will be submitted to AACS for certification.

2. Digital upload via Aspera is our preferred method of delivery. This method requires a pre-arranged Aspera connectivity. If using Aspera, Conectiv supports only Aspera products that interface with our Aspera Enterprise Server; we do not support Aspera Faspex or the Aspera Connect Browser Plug-in. The upload must be identified using the Conectiv Global Identification Label (GIL) naming convention. Contact your assigned Conectiv Customer Service Representative for GIL naming requirements.

3. If physical media is provided, Conectiv accepts LTO tapes or a USB 2.0/3.0 external storage device (2.5 or 3.5 inch form factor HDD or SSD). LTO tapes must be written using Windows Backup. Physical media should be clearly labeled with the customer catalog number, and should contain a UHDCMF file set at the root directory level. Contact your assigned Conectiv Customer Service Representative with any questions.
